

## *Lionsgate/Starz, Office Relocation* *530 Fifth Avenue, New York, NY*

BGA and its long-standing client, RXR Realty Corporation, collaborated to assist RXR's tenant, Lionsgate/Starz, with its relocation to a full floor space of 34,000 SF, at its current prime Fifth Avenue location. BGA worked with Lionsgate's California-based architectural firm to integrate their layout requirements with RXR's new building standards. Project features include:

- Creating a sense of openness and collaboration by incorporating glass office fronts to share daylight with the open work areas
- Integration of an exposed slab ceiling concept in the open plan work areas and corridors, to increase the sense of height. Coordinated with the MEP engineers to achieve a streamlined appearance for the mechanical systems
- For a dramatic lighting effect in the Pantry/Breakout area, specified various-sized Mirror-finish pendant light fixtures to interject a playful quality
- A selection of charcoal finishes contrasted with the bright, sleek, white walls to evoke a futuristic feel and create a sense of excitement and vibrancy
